★ As a result of an amendment to Schedule M of the Bank Act, the chartered banks now record "accumulated appropriation for losses" on the liability side of the balance sheet rather than as a deduction from loans and other assets as they had done in the past. This change has affected certain asset items in the monthly statistics beginning October 31, 1967 and in the weekly statistics beginning November 29, 1967. In order to provide comparable data the following asset items have been revised back to November 24, 1965: Net foreign currency assets; Call and short term loans; Loans in Canadian Dollars - Municipal, Grain dealers, Instalment finance companies, General loans, Other residential mortgages; Other Canadian Securities - Municipal and corporate; All other assets; and Total Canadian and net foreign assets. The term "Accumulated Appropriation for Losses" has been added to monthly table on liabilities.

1. Capital, rest fund and undivided profits as at the latest fiscal year-end.
2. Amortized value. See also footnote 1 on page 7.
3. Includes Canadian issues payable in foreign currency. Accrued interest also included.

4. Total of foreign funds, short-term foreign investments, gold bullion and other foreign currency assets less foreign currency liabilities. Excludes foreign currency securities issued by Canadian borrowers which are included under Canadian securities.
5. Research Department estimates.
6. Securities purchased directly from issuer with a term of less than one year at time of issue are classified as loans.
7. Loans to finance the purchase of Canada Savings Bonds at time of issue.
8. Includes securities guaranteed by provincial governments.
9. Includes bank premises, share of and loans to controlled corporations coin in Canada, Canadian dollar deposits with other banks and other assets.
10. On November 10, 1969 the Banque Populaire (previously the Banque d'Économie de Québec) commenced operations as a chartered bank. As a result at November 30, Canadian dollar deposits of the chartered banks were increased by \$66 million and the principal asset items affected were provincial and municipal securities, other residential mortgages and general loans.

★ Par suite d'une modification apportée à l'Annexe M de la Loi sur les banques, les "réserves pour pertes" figurent maintenant à une rubrique spéciale au passif des banques au lieu d'être déduites des prêts et autres actifs correspondants comme auparavant. Ce changement a affecté certains postes de l'actif, à compter du 31 octobre 1967 dans le cas des séries statistiques mensuelles et du 29 novembre 1967, dans le cas des séries hebdomadaires. Afin de fournir des données strictement comparables, les chiffres des rubriques suivantes à l'actif ont été révisés à partir du 24 novembre 1965: Avoir net en monnaies étrangères; Prêts sur titres, à vue ou à court terme; Prêts en dollars canadiens aux municipalités, aux négociants en céréales, aux sociétés de financement des ventes à tempérament, aux dépôts en chèques, à la construction domiciliaire; Prêts hypothécaires à la construction domiciliaire; Autres titres canadiens de municipalités et de sociétés; Autres éléments d'actif.

Ensemble des avoirs canadiens et des avoirs nets en monnaies étrangères. Une nouvelle rubrique "Réserves pour pertes" figure maintenant au passif.

- Capital social, fonds de prévoyance et bénéfices non répartis à la fin du dernier exercice.
- A leur valeur amortie. Voir aussi le renvoi 1 de la page 8.
- Y compris les titres canadiens payables en monnaies étrangères. Y compris également l'intérêt couru.

- Ensemble des devises, placements à court terme à l'étranger, lingots d'or et autres avoirs en monnaies étrangères — moins les engagements en monnaies étrangères. Les titres émis par des emprunteurs canadiens en monnaies étrangères ne figurent pas à cette rubrique, mais aux diverses rubriques couvrant les titres canadiens.
- Estimations du Service des recherches.
- Les titres achetés directement de l'émetteur et dont l'échéance, lors de l'émission, est à moins d'un an figurent aux bilans bancaires, comme prêts.
- Prêts destinés à financer l'achat d'obligations d'épargne du Canada lors de leur émission.
- Y compris les titres garantis par les gouvernements provinciaux.
- Comprend les immeubles sociaux, les actions des sociétés contrôlées par les banques, les prêts à ces sociétés, les monnaies divisionnaires canadiennes, les dépôts en dollars canadiens dans d'autres banques et autres éléments d'actif.
- La Banque d'Economie de Québec, banque d'épargne, est devenue, le 10 novembre 1969, La Banque Populaire, avec un statut de banque à charte. Ses dépôts, qui sont depuis lors recensés avec ceux des banques à charte, étaient de l'ordre de \$66 millions au 30 novembre. A l'actif, les principaux postes touchés par ce changement sont les suivants: Titres des provinces, Titres des municipalités, Autres prêts hypothécaires à la construction domiciliaire et Prêts généraux.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

† Revised.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis qui ont précédé immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois.

★ See footnote ★ on page 5 regarding major revisions to these series arising from an amendment to Schedule M of the Bank Act.

1. This table covers total foreign currency assets and liabilities, whether booked in Canada or abroad. For additional detail see next two pages and page 793 in the December 1965 "Statistical Summary".

2. Excludes foreign currency securities issued by Canadian borrowers, which are included in the balance sheet with Canadian securities; also excludes other foreign items, mainly bank premises abroad and investment in controlled companies.

3. Includes foreign notes and coin, gold, and foreign currency float which is frequently a net liability item.

★ Cette série a été l'objet d'une importante révision à la suite d'une modification apportée à l'Annexe M de la Loi sur les banques. Voir la note ★ au bas de la page 6.

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.

2. L'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. A noter, cependant, que le solde net de ces effets est souvent créditeur.

1. All series have been adjusted by means of a ratio to moving average technique and are subject to revision.
2. Less Canadian dollar cheques and other items in transit.
3. Excludes Government of Canada deposits.
4. Excludes day-to-day loans, call loans and loans for the purchase of Canada Savings Bonds at time of issue.
5. On November 10, 1969 the Banque Populaire (formerly the Banque d'Économie de Québec) commenced operations as a chartered bank (see footnote 10, page 5).

*

NOTE: The seasonally-adjusted, average of Wednesdays figures for November which are marked with an asterisk have been adjusted with a view to eliminating the unusual distortions which resulted this year from timing differences between the redemption of outstanding issues of Canada Savings Bonds and the receipt of the proceeds of sales of the new series during the first week of November. Net redemptions of Canada Savings Bonds in the week ending November 5, 1969 were approximately \$500 million higher than in the week ending November 6, 1968. To eliminate the effect of these net redemptions on the general public's holdings of bank deposits, the unadjusted weekly figures for November 5th for demand deposits and personal savings deposits were reduced by \$450 million and \$50 million respectively. Without this special adjustment the general public's holdings of currency and bank deposits in seasonally-adjusted terms for November would have been \$27,704 million while demand deposits and personal savings deposits would have been \$5,816 million and \$15,012 million respectively.

2. Moins les chèques ou autres effets en cours de compensation.

NOTE: Les statistiques du mois de novembre 1969 marquées d'un astérisque (Moyennes des mercredis — désaisonnalisées) ont été ajustées en vue d'éliminer les distorsions extraordinaires causées cette année par le décalage entre le remboursement d'émissions précédentes d'Obligations d'Épargne du Canada et la réception du produit des ventes de la nouvelle émission au cours de la 1^{re} semaine de novembre. Les remboursements nets d'Obligations d'Épargne du Canada au cours de la semaine terminée le 5 novembre ont été d'environ \$500 millions supérieurs à ceux de la semaine correspondante de l'année dernière. Pour compenser l'effet de ces remboursements nets sur les dépôts du public dans les banques, les chiffres non désaisonnalisés des dépôts au 5 novembre ont été réduits des montants suivants: Dépôts à vue, \$450 millions; dépôts d'épargne personnel, \$50 millions.

Sans cet ajustement, les chiffres désaisonnalisés pour novembre auraient été les suivants:

* Les cours sont la moyenne des cours acheteur et vendeur à la clôture. Les rendements sont exprimés en % par année, la date retenue pour le calcul étant l'échéance, lorsque le cours est au-dessous du pair, et la première date où un remboursement par anticipation

pourrait être effectué, lorsque le cours est au-dessus du pair.

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

- The effective dates are shown in brackets.
- In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.
- Following the Wednesday date shown. Weekly data are given on page 4.
- Direct debt payable in Canadian dollars and excluding perpetuities. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.
- The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.

- Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.

- Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.

- Non-chequable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.

- As at month-end.

- Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.

- The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

- La date d'entrée en vigueur est indiquée entre parenthèses.
- Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.
- Lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 4.
- Dettes publiques payables en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.88% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.
- Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes a été récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.

- Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.
- Taux affichés pour les dépôts de sommes importantes. Les taux effectifs sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.
- Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.
- A la fin du mois.
- Taux cotés par un certain nombre de sociétés importantes de fiducie. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.
- Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.
- Chiffres rectifiés à partir d'octobre 1965.

1. Includes small amount of investments (less than \$1.1 million at Dec. 31, 1969).

2. The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

1. Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 31 déc. 1969).

2. Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are currently unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.

2. New and used vehicles. † Revised.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible présentement d'établir un total pour cette année. À partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.

2. Véhicules neufs et d'occasion. † Chiffres rectifiés.

★NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been re-structured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

*NOTE: Le BFS a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

1. Estimations à partir d'un échantillonnage couvrant environ 35,000 foyers, donc sujettes à une marge d'erreur dont l'importance, pour chaque catégorie, est d'autant plus appréciable que les effectifs sont moindres.

2. Chiffres du ministère de la Défense nationale.

3. Les enquêtes ne comprennent pas la population du Yukon ni celle des Territoires du Nord-Ouest.

4. Le total de ces trois rubriques ne correspond pas exactement, pour les années antérieures à 1964, au chiffre global de l'emploi parce que la répartition, selon leur statut matrimonial, des femmes ayant un emploi n'a pas été révisée, pour ces années, par référence aux données de base du recensement de 1961.

★ Based on Import Commodity Classification introduced by D.B.S. in January 1964. A complete list of the commodity classification numbers included in each category is available on request from the Research Department, Bank of Canada.

■ Arbitrary adjustments have been made to the import commodity detail for the period from the second quarter 1966 to the third quarter 1967 to allow for revisions to the import figures caused by a lag in the receipt by D.B.S. of import documents from an important Canadian port.

- Comprises conveying, elevating, material handling, construction, excavating, mining, petroleum and natural gas industries equipment.
- Comprises mainly wood, paper, metalworking, printing, book binding, textiles, leather, food and tobacco industries equipment.
- Comprises mainly industrial furnaces and linings, other general purpose industrial machinery, communications industry equipment, precision instruments, scientific and medical equipment, hand tools, office equipment and furniture.
- Includes non-alcoholic beverages.
- Mainly shipments valued at less than \$200 each and Canadian exports returned.

1 Revised.

★ D'après la nomenclature des produits importés adoptée par le B.F.S. en janvier 1964. On pourra obtenir sur simple demande au Service des recherches de la Banque du Canada, à Ottawa, la liste complète des numéros de tous les produits groupés dans chaque catégorie.

■ Par suite de certains retards survenus dans la réception des documents d'importation transmis au B.F.S. par un important port canadien entre avril 1966 et septembre 1967, le montant des importations pour les six trimestres en question a été révisé et les différences ont été réparties arbitrairement entre les diverses catégories de produits importés.

- Comprend les convoyeurs et le matériel pour levage, manutention, construction, excavation, mines et industries du pétrole et du gaz naturel.
- Comprend principalement le matériel des secteurs suivants: bois, papier, métallurgie, imprimerie, reliure, textiles, cuir, aliments et tabacs.
- Comprend principalement: fours industriels et garnitures, autres machines industrielles d'utilité générale, matériels de télécommunication, instruments de précision, matériel scientifique et médical, outils portatifs, matériels et mobiliers de bureau.
- Y compris les boissons non alcooliques.
- Principalement les expéditions d'une valeur de moins de \$200 et les exportations canadiennes renvoyées à l'étranger.

★ As a result of an amendment to Schedule M of the Bank Act, the chartered banks now record "accumulated appropriation for losses" on the liability side of the balance sheet rather than as a deduction from loans and other assets as they had done in the past. This change has affected certain asset items in the monthly statistics beginning October 31, 1967 and in the weekly statistics beginning November 29, 1967. In order to provide comparable data the following asset items have been revised back to November 24, 1965: Net foreign currency assets; Call and short term loans; Loans in Canadian Dollars—Municipal, Grain dealers, Instalment finance companies, General loans, Other residential mortgages; Other Canadian Securities—Municipal and corporate; All other assets; and Total Canadian and net foreign assets. The term "Accumulated Appropriation for Losses" has been added to monthly table on liabilities.

- Capital, rest fund and undivided profits as at the latest fiscal year-end.
- Amortized value. See also footnote 1 on page 85.
- Includes Canadian issues payable in foreign currency. Accrued interest also included.

- Total of foreign funds, short-term foreign investments, gold bullion and other foreign currency assets less foreign currency liabilities. Excludes foreign currency securities issued by Canadian borrowers which are included under Canadian securities.
- Research Department estimates.
- Securities purchased directly from issuer with a term of less than one year at time of issue are classified as loans.
- Loans to finance the purchase of Canada Savings Bonds at time of issue.
- Includes securities guaranteed by provincial governments.
- Includes bank premises, share of and loans to controlled corporations coin in Canada, Canadian dollars deposits with other banks and other assets.
- On November 10, 1969 the Banque Populaire (previously the Banque d'Economie de Québec) commenced operations as a chartered bank. As a result at November 30, Canadian dollar deposits of the chartered banks were increased by \$66 million and the principal asset items affected were provincial and municipal securities, other residential mortgages and general loans.

* Par suite d'une modification apportée à l'Annexe M de la Loi sur les banques, les "réserves pour pertes" figurent maintenant à une rubrique spéciale au passif des banques au lieu d'être déduites des prêts et autres actifs correspondants comme auparavant. Ce changement a affecté certains postes de l'actif, à compter du 31 octobre 1967 dans le cas des séries statistiques mensuelles et du 29 novembre 1967, dans le cas des séries hebdomadaires. Afin de fournir des données strictement comparables, les chiffres des rubriques suivantes à l'actif ont été révisés à partir du 24 novembre 1965: Avoir net en monnaies étrangères; Prêts sur titres, à vue ou à court terme; Prêts en dollars canadiens aux municipalités, aux négociants en céréales, aux sociétés de financement des ventes à tempérament, Prêts généraux, Autres prêts hypothécaires à la construction domiciliaire; Autres titres canadiens de municipalités et de sociétés; Autres éléments d'actif; Ensemble des avoirs canadiens et des avoirs nets en monnaies étrangères. Une nouvelle rubrique "Réserves pour pertes" figure maintenant au passif.

1. Capital social, fonds de prévoyance et bénéfices non répartis à la fin du dernier exercice.
2. À leur valeur amortie. Voir aussi le renvoi 1 de la page 86.
3. Y compris les titres canadiens payables en monnaies étrangères. Y compris également l'intérêt couru.

4. Ensemble des devises, placements à court terme à l'étranger, lingots d'or et autres avoirs en monnaies étrangères — moins les engagements en monnaies étrangères. Les titres émis par des emprunteurs canadiens en monnaies étrangères ne figurent pas à cette rubrique, mais aux diverses rubriques couvrant les titres canadiens.
5. Estimations du Service des recherches.
6. Les titres achetés directement de l'émetteur et dont l'échéance, lors de l'émission, est à moins d'un an figurent aux bilans bancaires, comme prêts.
7. Prêts destinés à financer l'achat d'obligations d'épargne du Canada lors de leur émission. Y compris les titres garantis par les gouvernements provinciaux.
8. Comprend les immeubles sociaux, les actions des sociétés contrôlées par les banques, les prêts à ces sociétés, les monnaies divisionnaires canadiennes, les dépôts en dollars canadiens dans d'autres banques et autres éléments d'actif.
9. La Banque d'Économie de Québec, banque d'épargne, est devenue, le 10 novembre 1969, La Banque Populaire, avec un statut de banque à charte. Ses dépôts, qui sont depuis lors recensés avec ceux des banques à charte, étaient de l'ordre de \$66 millions au 30 novembre. A l'Actif, les principaux postes touchés par ce changement sont les suivants: Titres des provinces, Titres des municipalités, Autres prêts hypothécaires à la construction domiciliaire et Prêts généraux.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposits liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

† Revised.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis précédant immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois. Chiffres rectifiés.

★ In 1967 the Bank Act schedule for the reporting of earnings and expenses was revised. Figures for financial years 1964-66 are shown on a comparable basis in this table.

- In the period 1965-69 all banks ended their financial years on October 31. In 1964 five banks ended their financial years on October 31, two on November 30 and one on September 30.
- Excluding realized profits and losses on securities held in investment account which are included in the item "Loss experience not included in other operating expenses", shown below.
- Including provision for losses based on five-year average loss experience; in 1969 this amounted to \$29.6 million or 0.136% of related loans.
- Before provision for income taxes and appropriations for losses other than those included in "other operating expenses".
- General and tax-paid appropriations for losses; net after any transfers out of accumulated appropriations for losses to undivided profits or rest account.

★ La formule prévue en annexe à la Loi sur les banques pour le rapport des revenus et des dépenses a été révisée en 1967. Les chiffres des exercices précédents, de 1964 à 1966, sont présentés sur la base de la nouvelle formule.

- Dates de clôture des exercices, en 1964: cinq banques, 30 octobre; deux banques, 30 novembre; une banque, 30 septembre; de 1965 à 1969: 31 octobre dans chaque cas.
- Non compris les pertes ou les bénéfices réalisés sur les valeurs détenues à titre de placements, qui figurent ci-dessous à la rubrique "Pertes sur les prêts et placements, moins la provision incluse dans les autres frais d'exploitation".
- Y compris une provision forfaitaire pour pertes, basée sur la moyenne annuelle des pertes au cours des cinq derniers exercices. Cette provision a été de \$29.6 millions en 1969, soit 0,136% des prêts en cause.
- Non compris la provision pour l'impôt sur le revenu et les provisions pour pertes sauf, dans ce dernier cas, les provisions comprises dans les "Autres frais d'exploitation".
- Augmentation nette des réserves pour pertes (réserves générales et réserves libres d'impôt), soit les provisions de l'exercice, moins les transferts, au cours de l'exercice, au compte des profits et pertes ou au fonds de réserve.

2. Excludes foreign currency securities issued by Canadian borrowers, which are included in the balance sheet with Canadian securities; also excludes other foreign items, mainly bank premises abroad and investment in controlled companies.

3. Includes foreign notes and coin, gold, and foreign currency float which is frequently a net liability item.

★ Cette série a été l'objet d'une importante révision à la suite d'une modification apportée à l'Annexe M de la Loi sur les banques. Voir la note ★ au bas de la page 84.

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.

2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créditeur.

NOTE: The seasonally-adjusted, average of Wednesdays figures for November which are marked with an asterisk have been adjusted with a view to eliminating the unusual distortions which resulted this year from timing differences between the redemption of outstanding issues of Canada Savings Bonds and the receipt of the proceeds of sales of the new series during the first week of November. Net redemptions of Canada Savings Bonds in the week ending November 5, 1969 were approximately \$500 million higher than in the week ending November 6, 1968. To eliminate the effect of these net redemptions on the general public's holdings of bank deposits, the unadjusted weekly figures for November 5th for demand deposits and personal savings deposits were reduced by \$450 million and \$50 million respectively. Without this special adjustment the general public's holdings of currency and bank deposits in seasonally-adjusted terms for November would have been \$27,704 million while demand deposits and personal savings deposits would have been \$5,821 million and \$15,007 million respectively.

*

NOTE: Les statistiques du mois de novembre 1969 marquées d'un astérisque (Moyennes des mercredis — désaisonnalisées) ont été ajustées en vue d'éliminer les distorsions extraordinaires causées cette année par le décalage entre le remboursement d'émissions précédentes d'Obligations d'Épargne du Canada et la réception du produit des ventes de la nouvelle émission au cours de la 1^{ère} semaine de novembre. Les remboursements nets d'Obligations d'Épargne du Canada au cours de la semaine terminée le 5 novembre ont été d'environ \$500 millions supérieurs à ceux de la semaine correspondante de l'année dernière. Pour compenser l'effet de ces remboursements nets sur les dépôts du public dans les banques, les chiffres non désaisonnalisés des dépôts au 5 novembre ont été réduits des montants suivants: Dépôts à vue, \$450 millions; dépôts d'épargne personnel, \$50 millions.

Sans cet ajustement, les chiffres désaisonnalisés pour novembre auraient été les suivants:

* Les cours sont la moyenne des cours acheteur et vendeur à la clôture. Les rendements sont exprimés en % par année, la date retenue pour le calcul étant l'échéance, lorsque le cours est au-dessous du pair, et la première date où un remboursement par anticipation

pourrait être effectué, lorsque le cours est au-dessus du pair.

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

- The effective dates are shown in brackets.
- In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.
- Following the Wednesday date shown. Weekly data are given on page 82.
- Direct debt payable in Canadian dollars and excluding perpetuities. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.
- The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.

- Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.
- Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.
- Non-chequable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.
- As at month-end.
- Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.
- The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

La moyenne des échéances des obligations de chacun des deux groupes a été récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.

- Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.
- Taux affichés pour les dépôts de sommes importantes. Les taux effectifs sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.
- Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.
- A la fin du mois.
- Taux cotés par un certain nombre de sociétés importantes de fiducie. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.
- Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

PAGE 125

9. Obligations de sociétés canadiennes payables en dollars canadiens ou en monnaies étrangères — sauf, dans ce dernier cas, lorsque le produit doit en être utilisé à l'étranger — et obligations de sociétés étrangères en dollars canadiens, lorsque le produit doit en être utilisé au Canada. Non compris le papier commercial à un an ou moins.

10. Toutes les émissions des institutions canadiennes ont été effectuées en dollars canadiens. Les émissions des prêteurs étrangers se sont élevées à \$5 millions en 1964, à \$25 millions et \$7 millions respectivement pour les 1^{er} et 4^e trimestres de 1965, \$20 millions en 1966, \$20 millions en 1967, et \$15 millions en 1968. Il y a eu des amortissements et des rachats tout au cours des années indiquées.

11. Aux prix d'émission.

12. Y compris les actions émises en dollars É.-U. ou dont les dividendes sont payables en dollars É.-U.

13. Non compris le rachat par des compagnies d'assurance-vie de leurs propres actions, (article 90A de la Loi sur les compagnies d'assurance canadiennes et britanniques).

14. Y compris les sommes distribuées par la B.C. Power Corporation à ses actionnaires — sur les fonds reçus de la province de la Colombie-Britannique — en paiement d'actions de la B.C. Electric, soit \$115 millions au 1^{er} trimestre de 1964 et \$2 millions au 1^{er} trimestre de 1965.

PAGES 127-128

15. Les filiales qui ont pour fonction de financer les ventes ou les immeubles des sociétés mères figurent à la même rubrique que celles-ci.

16. Y compris le rachat du capital social des sociétés privées d'énergie hydro-électrique acquises par l'Hydro-Québec — \$345 millions en actions ordinaires et \$55 millions en actions privilégiées — et une émission d'actions de Shawinigan Industries Limited au montant de \$44 millions. Sur les \$55 millions en actions privilégiées, \$53 millions ont été échangés contre des obligations garanties par la province de Québec.

NOTE: On pourra obtenir sur simple demande au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux indiquant, pour les titres du gouvernement canadien, les obligations des provinces et des sociétés, le montant des émissions brutes, amortissements et émissions nettes au cours de chaque trimestre, de 1936 à 1968. Peuvent aussi être obtenus des tableaux indiquant, pour les obligations du gouvernement canadien, des provinces, des municipalités et des sociétés, l'encours en fin d'année, de 1935 à 1968, réparti par devises de paiement.

1. Includes small amount of investments (less than \$1.1 million at Dec. 31, 1969).
2. The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

1. Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 31 déc. 1969).
2. Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are currently unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.

2. New and used vehicles.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible présentement d'établir un total pour cette année. À partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.

2. Véhicules neufs et d'occasion.

*NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been re-structured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

NOTE: Le BFS a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

★ Canada's quota in the General Account of the I.M.F. was set at the equivalent of U.S. \$300 million in February 1947, raised to U.S. \$550 million in October 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars. Transactions with the Special Drawing Account are not included in this table; Canada's holdings of SDR's are shown in the table on the facing page.

- Loans to I.M.F. by Canada under the General Arrangements to Borrow.
- Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966 and I.M.F. dividend payments to Canada of U.S. \$2.8 million in October 1968 and U.S. \$0.2 million in October 1969. All other transactions are gold sales to Canada by the I.M.F.
- Loans resulting from Canadian transactions with the I.M.F. and with other participants.
- Equals I.M.F. holdings of Canadian dollars minus the Canadian quota.
- Equals the Canadian quota plus outstanding loans under the GAB minus I.M.F. holdings of Canadian dollars. This is the amount of foreign exchange which Canada is entitled to draw from the Fund on demand for balance of payments purposes.

★ La quote-part du Canada au Compte Général du F.M.I., fixée à la contre-valeur de 300 millions de dollars É.-U. en février 1947, fut portée à 550 millions de dollars É.-U. en octobre 1959 et à 740 millions de dollars É.-U. en mai 1966; 25% ont été souscrits en or et 75% en dollars canadiens. Les transactions entre le Canada et le Fonds au titre des Droits de Tirage Spéciaux ne figurent pas au tableau ci-dessus; on trouvera à la page suivante les données relatives aux D.T.S. détenus par le Canada.

- Prêts du Canada au F.M.I. en vertu des Accords Généraux d'Emprunt.
- Y compris le paiement de notre souscription en monnaie canadienne, équivalant à 142.5 millions de dollars É.-U. en mai 1966 et le versement de dividendes par le F.M.I. au Canada, pour un montant de 2.8 millions de dollars É.-U. en octobre 1968 et de 0.2 million de dollars É.-U. en octobre 1969. Toutes les autres transactions sont des ventes d'or au Canada par le F.M.I.
- Prêts résultant de transactions du Canada avec le F.M.I. et avec d'autres participants.
- Avoir du F.M.I. en dollars canadiens, moins la quote-part du Canada au Fonds.
- Quote-part du Canada, plus les prêts du Canada en vertu des A.G.d'É., moins l'avoir du Fonds en dollars canadiens; en d'autres termes, montant que le Canada est autorisé à tirer sur le Fonds en monnaies étrangères pour les besoins de sa balance des paiements.

- On November 10, 1969 the Banque Populaire (previously the Banque d'Économie de Québec) commenced operations as a chartered bank. As a result at November 30, Canadian dollar deposits of the chartered banks were increased by \$66 million and the principal asset items affected were provincial and municipal securities, other residential mortgages and general loans.
- In January these items reflect a change in the classification of chartered bank holdings of short-term paper and are not completely comparable with the data for earlier months. Previously, holdings of paper with an original term to maturity of one year or less issued by customers of a bank with established lines of credit were classified as loans. Short-term paper is now classified as a loan only if it is purchased from the issuer; paper purchased from third parties subsequent to issue is classified as a security. Under this new classification the corresponding figures for December 1969 would have been: Net Foreign Currency Assets, -\$186 million; Instalment Finance Company Loans, \$471 million; General Loans, \$14,817 million; and Corporate Securities, \$809 million.

- La Banque d'Économie de Québec, banque d'épargne, est devenue, le 10 novembre

1969, La Banque Populaire, avec un statut de banque à charte. Ses dépôts, qui sont depuis lors recensés avec ceux des banques à charte, étaient de l'ordre de \$66 millions au 30 novembre. A l'Actif, les principaux postes touchés par ce changement sont les suivants: Titres des provinces, Titres des municipalités, Autres prêts hypothécaires à la construction domiciliaire et Prêts généraux.

- A partir de janvier, les chiffres de ces postes ne sont pas strictement comparables à ceux des mois précédents — par suite d'une modification de la classification du papier à court terme détenu par les banques à charte. Avant cette année, les billets à court terme (ayant une échéance initiale d'un an ou moins) signés par des clients jouissant de facilités de crédit auprès d'une banque figuraient au bilan de cette banque comme prêts. Désormais, ces billets ne figurent sous cette rubrique que si la banque les a achetés directement de l'émetteur même; les billets achetés de tiers après leur émission sont considérés comme titres. D'après cette nouvelle classification, les chiffres correspondants pour décembre 1969 auraient été: Avoir net en monnaies étrangères, —\$186 millions; Prêts aux sociétés de financement des ventes à tempérament, \$471 millions; Prêts généraux, \$14,817; et Titres des sociétés, \$809 millions.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

† Revised.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis précédant immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois. 1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.
2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

NOTE: The seasonally-adjusted, average of Wednesdays figures for November which are marked with an asterisk have been adjusted with a view to eliminating the unusual distortions which resulted this year from timing differences between the redemption of outstanding issues of Canada Savings Bonds and the receipt of the proceeds of sales of the new series during the first week of November. Net redemptions of Canada Savings Bonds in the week ending November 5, 1969 were approximately \$500 million higher than in the week ending November 6, 1968. To eliminate the effect of these net redemptions on the general public's holdings of bank deposits, the unadjusted weekly figures for November 5th for demand deposits and personal savings deposits were reduced by \$450 million and \$50 million respectively. Without this special adjustment the general public's holdings of currency and bank deposits in seasonally-adjusted terms for November would have been \$27,704 million while demand deposits and personal savings deposits would have been \$5,821 million and \$15,007 million respectively.

*

NOTE: Les statistiques du mois de novembre 1969 marquées d'un astérisque (Moyennes des mercredis — désaisonnalisées) ont été ajustées en vue d'éliminer les distorsions extraordinaires causées cette année par le décalage entre le remboursement d'émissions précédentes d'Obligations d'Épargne du Canada et la réception du produit des ventes de la nouvelle émission au cours de la 1^{ère} semaine de novembre. Les remboursements nets d'Obligations d'Épargne du Canada au cours de la semaine terminée le 5 novembre ont été d'environ \$500 millions supérieurs à ceux de la semaine correspondante de l'année dernière. Pour compenser l'effet de ces remboursements nets sur les dépôts du public dans les banques, les chiffres non désaisonnalisés des dépôts au 5 novembre ont été réduits des montants suivants: Dépôts à vue, \$450 millions; dépôts d'épargne personnel, \$50 millions.

Sans cet ajustement, les chiffres désaisonnalisés pour novembre auraient été les suivants:

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

1. The effective dates are shown in brackets.

2. In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.

3. Following the Wednesday date shown. Weekly data are given on page 173.

4. Direct debt payable in Canadian dollars and excluding perpetuities. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.

5. The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.

6. Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.

7. Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.

8. Non-chequable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.

9. As at month-end.

10. Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.

11. The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

- La date d'entrée en vigueur est indiquée entre parenthèses.
- Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.
- Lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 173.
- Dettes publiques payables en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture du mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.88% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.
- Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes a été récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.

6. Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.

7. Taux affichés pour les dépôts de sommes importantes. Les taux effectifs sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.

8. Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.

9. A la fin du mois.

10. Taux cotés par un certain nombre de sociétés importantes de fiducie. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.

11. Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

** The totals for 1966 are currently unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.

2. New and used vehicles.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible présentement d'établir un total pour cette année. À partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.

2. Véhicules neufs et d'occasion.

*NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been restructured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

*NOTE: Le BFS a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

★ Based on Import Commodity Classification introduced by D.B.S. in January 1964. A complete list of the commodity classification numbers included in each category is available on request from the Research Department, Bank of Canada.

■ Arbitrary adjustments have been made to the import commodity detail for the period from the second quarter 1966 to the third quarter 1967 to allow for revisions to the import figures caused by a lag in the receipt by D.B.S. of import documents from an important Canadian port.

1. Comprises conveying, elevating, material handling, construction, excavating, mining, petroleum and natural gas industries equipment.
2. Comprises mainly wood, paper, metalworking, printing, book binding, textiles, leather, food and tobacco industries equipment.

★ D'après la nomenclature des produits importés adoptée par le B.F.S. en janvier 1964. On pourra obtenir sur simple demande au Service des recherches de la Banque du Canada, à Ottawa, la liste complète des numéros de tous les produits groupés dans chaque catégorie.

■ Par suite de certains retards survenus dans la réception des documents d'importation transmis au B.F.S. par un important port canadien entre avril 1966 et septembre 1967, le montant des importations pour les six trimestres en question a été révisé et les différences ont été réparties arbitrairement entre les diverses catégories de produits importés.

- On November 10, 1969 the Banque Populaire (previously the Banque d'Économie de Québec) commenced operations as a chartered bank. As a result at November 30, Canadian dollar deposits of the chartered banks were increased by \$66 million and the principal asset items affected were provincial and municipal securities, other residential mortgages and general loans.
- In January these items reflect a change in the classification of chartered bank holdings of short-term paper and are not completely comparable with the data for earlier months. Previously, holdings of paper with an original term to maturity of one year or less issued by customers of a bank with established lines of credit were classified as loans. Short-term paper is now classified as a loan only if it is purchased from the issuer; paper purchased from third parties subsequent to issue is classified as a security. Under this new classification the corresponding figures for December 1969 would have been: Net Foreign Currency Assets, -\$186 million; Instalment Finance Company Loans, \$471 million; General Loans, \$14,817 million; and Corporate Securities, \$809 million.

9. La Banque d'économie de Québec, banque d'épargne, est devenue, le 10 novembre

1969, La Banque Populaire, avec un statut de banque à charte. Ses dépôts, qui sont depuis lors recensés avec ceux des banques à charte, étaient de l'ordre de \$66 millions au 30 novembre. A l'Actif, les principaux postes touchés par ce changement sont les suivants: Titres des provinces, Titres des municipalités, Autres prêts hypothécaires à l'habitation et Prêts généraux.

10. A partir de janvier, les chiffres de ces postes ne sont pas strictement comparables à ceux des mois précédents - par suite d'une modification de la classification du papier à court terme détenu par les banques à charte. Avant cette année, les billets à court terme (ayant une échéance initiale d'un an ou moins) signés par des clients jouissant de facilités de crédit auprès d'une banque figuraient au bilan de cette banque comme prêts. Désormais, ces billets ne figurent sous cette rubrique que si la banque les a achetés directement de l'émetteur même; les billets achetés de tiers après leur émission sont considérés comme titres. D'après cette nouvelle classification, les chiffres correspondants pour décembre 1969 auraient été: Avoir net en monnaies étrangères, \$186 millions; Prêts aux sociétés de financement des ventes à tempérament, \$471 millions; Prêts généraux, \$14,817; et Titres des sociétés, \$809 millions.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday in the previous month.

1. Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.

† Revised.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis précédant immédiatement le dernier mercredi du mois antérieur.

1. Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois.

- Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.
- À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.
- Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créditeur.

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

1. The effective dates are shown in brackets.

2. In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.

3. Following the Wednesday date shown. Weekly data are given on page 251.

4. Direct debt payable in Canadian dollars and excluding perpetuities. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.

5. The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.

6. Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.

7. Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.

8. Non-chequable savings deposits were introduced by the chartered banks in May 1967, following the revision of the Bank Act.

9. As at month-end.

10. With the co-operation of the chartered banks the Bank of Canada initiated a quarterly survey of chartered bank lending rates in November 1968. The survey covers all loan transactions, whereby a customer's account is credited with funds whether under existing, new or renewed authorizations. The survey specifically excludes unsecured personal loans, residential mortgage loans, day loans, call loans and loans to grain dealers. The banks selected a broadly representative sample of branches which report the details of all their loans made on three consecutive days near the middle of each quarter. A total of 125 branches are involved and they have reported on approximately 5,000 loans each quarter. The rates shown are weighted by dollar volume.

11. Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.

12. The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

- La date d'entrée en vigueur est indiquée entre parenthèses.
- Le taux de l'escompte a en outre été réduit de 7% à 7% à partir du 2 juillet 1968.
- Le lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 251.
- Dettes publiques payables en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.68% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.
- Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes était récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.
- Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.
- Taux affichés pour les dépôts de sommes importantes. Les taux réels sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.

8. Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.

9. A la fin du mois.

10. Grâce à la coopération des banques à charte, la Banque du Canada a entrepris en novembre 1968 de faire trimestriellement un relevé des taux d'intérêt débiteurs pratiqués par les banques. Ce relevé couvre toutes les opérations de prêts qui se traduisent par un crédit au compte d'un client, que ce soit en vertu d'autorisations existantes ou nouvelles, ou encore de renouvellements. En sont expressément exclus les prêts personnels, les prêts hypothécaires à l'habitation, les prêts au jour le jour, les prêts sur titres et les prêts aux négociants en céréales. Chaque banque a choisi un échantillon aussi représentatif que possible de ses succursales, à qui elle a demandé de fournir les détails nécessaires sur tous les prêts consentis au cours de trois jours consécutifs vers le milieu de chaque trimestre. Au total, 125 succursales participent à chacun de ces relevés trimestriels, qui portent en moyenne sur 5,000 prêts. Les taux indiqués sont pondérés par le montant des prêts.

11. Taux cotés par un certain nombre de sociétés de fiducie importantes. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.

12. Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. l'étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

★ Credit extended mainly to individuals, includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms of credit for which no statistics are available.

1. The figures shown represent the instalment loan balances outstanding on retail purchases of consumers' goods financed under conditional sales agreements by sales finance and consumer loan companies. The sales finance companies extend a small amount of cash loans but monthly data on cash loans is available only for the consumer loan companies.

2. Companies licensed under the Small Loans Act and affiliated companies engaged in making personal loans.

3. See table on page 260, for complete breakdown of chartered bank personal loans.

4. Figures for dates other than year-ends are estimated on the basis of loans made by sixteen companies.

5. Not strictly comparable to the data shown for the earlier period because outstanding loans which have financed passenger cars used for commercial purposes are excluded beginning in January 1970.

* Crédits accordés surtout aux particuliers. Y compris certains montants, dont l'importance ne peut être déterminée, qui ont servi à des fins autres que la consommation; non compris, d'autre part, certaines formes de crédit qui ne font l'objet d'aucune statistique.

1. Financement, au moyen de contrats de vente conditionnelle, d'achats au détail de biens de consommation. Non compris, dans le cas des sociétés de financement, un montant, d'ailleurs peu important, de prêts en espèces, qui ne font l'objet d'aucune statistique mensuelle.

2. Sociétés sous le régime de la Loi sur les petits prêts personnels et sociétés filiales qui pratiquent le prêt personnel.

3. Le tableau à la page 260 donne une ventilation des prêts personnels des banques à charte.

4. Sauf en fin d'année, les chiffres sont des estimations, faites à partir du montant des prêts de seize sociétés.

5. Ces chiffres ne sont pas strictement comparables à ceux des années précédentes car, à partir de janvier 1970, l'encours des prêts pour le financement d'achats de voitures particulières destinées à un usage commercial en a été exclus.

1. Includes small amount of investments (less than \$1.1 million at Feb. 28, 1970).

2. The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

1. Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 28 fév. 1970).

2. Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.
2. New and used vehicles.
3. Beginning in January 1970, passenger cars used for commercial purposes are included in the data relating to commercial goods rather than consumer goods.
4. Beginning in January 1970, includes the installment financing of the consumer loan companies.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible d'établir un total pour cette année. À partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.
2. Véhicules neufs et d'occasion.
3. À partir de janvier 1970, les données relatives aux voitures particulières affectées à l'usage d'entreprises commerciales sont recensées sous la rubrique des biens utilisés par les entreprises et non celle des biens de consommation.
4. À partir de janvier 1970, ces chiffres comprennent les données relatives aux ventes à tempérament financées par les sociétés de crédit à la consommation.

★ A partir de janvier 1962, les chiffres concernant les recettes tiennent compte des réductions attribuables à la Loi de 1961 sur les arrangements fiscaux entre le gouvernement fédéral et les provinces, en vertu de laquelle chacune des provinces établit maintenant son propre régime d'impôt sur le revenu. Ces réductions ont d'ailleurs comme contrepartie des versements moins élevés aux provinces.

* Chiffres provisoires.

** Estimations budgétaires.

1. Par suite d'un important réaménagement des services au sein de l'Administration au cours de la période, les dépenses de plusieurs ministères (Finances, Justice, Travail, Main-d'œuvre et Immigration, Affaires indiennes et Nord canadien, Défense nationale et Approvisionnement et Services notamment) ne sont pas strictement comparables.

2. A partir de l'exercice 1967-1968, ces dépenses font partie du Régime canadien d'assistance publique.

3. Ce poste représente la différence entre le montant total des estimations budgétaires publiées antérieurement à l'exposé budgétaire et le montant total des dépenses prévues dans cet exposé.

4. Ce poste ne représente que les avances directes consenties au CN par le gouvernement. Depuis le 31 mars 1963, la dette du CN garantie par le gouvernement a été réduite des montants suivants (en millions de dollars): 1963-1964, 2.0; 1964-1965, 11.1; 1965-1966, 36.8; 1966-1967, 55.6; 1967-1968, 78.7; 1968-1969, 65.8; 1969-1970, 80.9.

*NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been re-structured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

*NOTE: Le BFS a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

* Canada's quota in the General Account of the I.M.F. was set at the equivalent of U.S. \$300 million in February 1947, raised to U.S. \$550 million in October 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars. Transactions with the Special Drawing Account are not included in this table; Canada's holdings of SDR's are shown in the table on the facing page.

- Loans to I.M.F. by Canada under the General Arrangements to Borrow.
- Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966 and I.M.F. dividend payments to Canada of U.S. \$2.8 million in October 1968 and U.S. \$0.2 million in October 1969. All other transactions are gold sales to Canada by the I.M.F.
- Loans resulting from Canadian transactions with the I.M.F. and with other participants.
- Equals I.M.F. holdings of Canadian dollars minus the Canadian quota.
- Equals the Canadian quota plus outstanding loans under the GAB minus I.M.F. holdings of Canadian dollars. This is the amount of foreign exchange which Canada is entitled to draw from the Fund on demand for balance of payments purposes.

* La quote-part du Canada au Compte Général du F.M.I., fixée à la contre-valeur de 300 millions de dollars É.-U. en février 1947, fut portée à 550 millions de dollars É.-U. en octobre 1959 et à 740 millions de dollars É.-U. en mai 1966; 25% ont été souscrits en or et 75% en dollars canadiens. Les transactions entre le Canada et le Fonds au titre des Droits de Tirage Spéciaux ne figurent pas au tableau ci-dessus; on trouvera à la page suivante les données relatives aux D.T.S. détenus par le Canada.

- Prêts du Canada au F.M.I. en vertu des Accords Généraux d'Emprunt.
- Y compris le paiement de notre souscription en monnaie canadienne, équivalant à 142.5 millions de dollars É.-U. en mai 1966 et le versement de dividendes par le F.M.I. au Canada, pour un montant de 2.8 millions de dollars É.-U. en octobre 1968 et de 0.2 million de dollars É.-U. en octobre 1969. Toutes les autres transactions sont des ventes d'or au Canada par le F.M.I.
- Prêts résultant de transactions du Canada avec le F.M.I. et avec d'autres participants.
- Avoir du F.M.I. en dollars canadiens, moins la quote-part du Canada au Fonds.
- Quote-part du Canada, plus les prêts du Canada en vertu des A.G.d'E., moins l'avoir du Fonds en dollars canadiens; en d'autres termes, montant que le Canada est autorisé à tirer sur le Fonds en monnaies étrangères pour les besoins de sa balance des paiements.

- On November 10, 1969 the Banque Populaire (previously the Banque d'Économie de Québec) commenced operations as a chartered bank. As a result at November 30, Canadian dollar deposits of the chartered banks were increased by \$66 million and the principal asset items affected were provincial and municipal securities, other residential mortgages and general loans.
- In January these items reflect a change in the classification of chartered bank holdings of short-term paper and are not completely comparable with the data for earlier months. Previously, holdings of paper with an original term to maturity of one year or less issued by customers of a bank with established lines of credit were classified as loans. Short-term paper is now classified as a loan only if it is purchased from the issuer; paper purchased from third parties subsequent to issue is classified as a security. Under this new classification the corresponding figures for December 1969 would have been: Net Foreign Currency Assets, \$186 million; Instalment Finance Company Loans, \$471 million; General Loans, \$14,817 million; and Corporate Securities, \$809 million.

- Ensemble des devises, placements à court terme à l'étranger, lingots d'or et autres avoirs en monnaies étrangères - moins les engagements en monnaies étrangères. Les titres émis par des emprunteurs canadiens en monnaies étrangères ne figurent pas à cette rubrique, mais aux diverses rubriques couvrant les titres canadiens.

- Comprend les immeubles sociaux, les actions des sociétés contrôlées par les banques, les prêts à ces sociétés, les monnaies divisionnaires canadiennes, les dépôts en dollars canadiens dans d'autres banques et autres éléments d'actif.
- La Banque d'Économie de Québec, banque d'épargne, est devenue, le 10 novembre

1969, La Banque Populaire, avec un statut de banque à charte. Ses dépôts, qui sont depuis lors recensés avec ceux des banques à charte, étaient de l'ordre de \$66 millions au 30 novembre. A l'actif, les principaux postes touchés par ce changement sont les suivants: Titres des provinces, Titres des municipalités, Autres prêts hypothécaires à l'habitation et Prêts généraux.

- A partir de janvier, les chiffres de ces postes ne sont pas strictement comparables à ceux des mois précédents - par suite d'une modification de la classification du papier à court terme détenu par les banques à charte. Avant cette année, les billets à court terme (ayant une échéance initiale d'un an ou moins) signés par des clients jouissant de facilités de crédit auprès d'une banque figuraient au bilan de cette banque comme prêts. Désormais, ces billets ne figurent sous cette rubrique que si la banque les a achetés directement de l'émetteur même; les billets achetés de tiers après leur émission sont considérés comme titres. D'après cette nouvelle classification, les chiffres correspondants pour décembre 1969 auraient été: Avoir net en monnaies étrangères, \$186 millions; Prêts aux sociétés de financement des ventes à tempérament, \$471 millions; Prêts généraux, \$14,817; et Titres des sociétés, \$809 millions.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday of the previous month.

- Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.
- Prior to March 1968 the chartered banks agreed on a voluntary basis to maintain secondary reserves, consisting of excess cash reserves, day-to-day loans and treasury bills, equal to not less than 7 per cent of their Canadian dollar deposit liabilities. Under the provisions of Section 18(2) of the 1967 Bank of Canada Act the Bank was empowered to establish a secondary reserve ratio requirement within the range of 6 per cent to 12 per cent of Canadian dollar deposit liabilities under certain conditions.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis précédant immédiatement le dernier mercredi du mois antérieur.

- Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15^e du mois ou (b) les jours ouvrables du 16 à la fin du mois.
- Avant mars 1968, les banques à charte avaient volontairement consenti à maintenir des réserves secondaires, composées de l'excédent de leurs réserves-encaisse, de prêts au jour le jour et de bons du Trésor, et dont le montant ne serait pas inférieur à 7% de leur passif-dépôt en dollars canadiens. Aux termes de l'Article 18(2) de la Loi sur la Banque du Canada, la Banque a le pouvoir de fixer, moyennant certaines conditions, le niveau minimal requis pour les réserves secondaires entre 6 et 12% du passif-dépôt en dollars canadiens.

2. N'inclut que les prêts remboursables par versements égaux (principal et intérêt compris).

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.

2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.

3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créancier.

★1. Avoirs et engagements en monnaies étrangères des sièges et succursales canadiennes seulement. Ces chiffres excluent, du côté des avoirs, toutes les transactions-or, c'est-à-dire l'or et les prêts-or, et du côté des engagements, les certificats de dépôts-or. Les chiffres figurant au tableau ci-dessus ne peuvent donc être comparés directement à ceux qui ont été publiés antérieurement.

2. Les agences et succursales des banques à charte à l'étranger sont considérées, pour les fins de ce tableau, comme banques étrangères.

3. Tous les billets et pièces métalliques de pays étrangers dans les encaisses des banques à charte au Canada sont assimilés, pour les fins de ce tableau, à des créances en dollars É.-U. sur les banques des États-Unis, y compris, dans une proportion d'ailleurs assez faible, les monnaies d'autres pays.

4. Y compris la Banque des Réglements Internationaux et le Communauté Européenne du Charbon et de l'Acier.

5. Y compris la Banque Internationale pour la Reconstruction et le Développement.

* Les cours sont la moyenne des cours acheteur et vendeur à la clôture. Les rendements sont exprimés en % par année, la date retenue pour le calcul étant l'échéance, lorsque le cours est au-dessous du pair, et la première date où un remboursement par anticipation

pourrait être effectué, lorsque le cours est au-dessus du pair.

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

- The effective dates are shown in brackets.
- In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.
- Following the Wednesday date shown. Weekly data are given on page 331.
- Direct debt payable in Canadian dollars and excluding perpetuals. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.
- The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.
- Since July 6, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.
- Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.

8. Non-chequeable savings deposits were introduced by the chartered banks in May 1967 following the revision of the Bank Act.

9. As at month-end.

10. With the co-operation of the chartered banks the Bank of Canada initiated a quarterly survey of chartered bank lending rates in November 1968. The survey covers all loan transactions, whereby a customer's account is credited with funds whether under existing, new or renewed authorizations. The survey specifically excludes unsecured personal loans, residential mortgage loans, day loans, call loans and loans to grain dealers. The banks selected a broadly representative sample of branches which report the details of all their loans made on three consecutive days near the middle of each quarter. A total of 125 branches are involved and they have reported on approximately 5,000 loans each quarter. The rates shown are weighted by dollar volume.

11. Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.

12. The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

- La date d'entrée en vigueur est indiquée entre parenthèses.
- Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.
- Lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 331.
- Dettes publiques payables en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1^{er} novembre 1964, 5.03% pour celle du 1^{er} novembre 1965, 5.48% pour celles du 1^{er} novembre 1966 et du 1^{er} novembre 1967, 6.88% pour l'émission du 1^{er} mai 1968 et 6.75% pour celle du 1^{er} novembre 1969.
- Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes était récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.
- Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.
- Taux affichés pour les dépôts de sommes importantes. Les taux réels sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.

- Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.
- À la fin du mois.

- Grâce à la coopération des banques à charte, la Banque du Canada a entrepris en novembre 1968 de faire trimestriellement un relevé des taux d'intérêt débiteurs pratiqués par les banques. Ce relevé couvre toutes les opérations de prêts qui se traduisent par un crédit au compte d'un client, que ce soit en vertu d'autorisations existantes ou nouvelles, ou encore de renouvellements. En sont expressément exclus les prêts personnels, les prêts hypothécaires à l'habitation, les prêts au jour le jour, les prêts sur titres et les prêts aux négociants en céréales. Chaque banque a choisi un échantillon aussi représentatif que possible de ses succursales, à qui elle a demandé de fournir les détails nécessaires sur tous les prêts consentis au cours de trois jours consécutifs vers le milieu de chaque trimestre. Au total, 125 succursales participent à chacun de ces relevés trimestriels, qui portent en moyenne sur 5,000 prêts. Les taux indiqués sont pondérés par le montant des prêts.
- Taux cotés par un certain nombre de sociétés de fiducie importantes. À partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.
- Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

1. Valeur comptable.

2. Avant le 4^e trimestre 1966, plusieurs sociétés déclaraient leurs placements en titres et en prêts hypothécaires après déduction des réserves de placement. Par la suite, leurs placements figurent au prix coûtant et les réserves correspondantes font l'objet d'une rubrique spéciale. Antérieurement au 4^e trimestre 1966, le total de l'actif ne comprend pas les dividendes, les intérêts courus et autres comptes à recevoir. Ces montants étaient alors déduits de l'ensemble des postes suivants du passif: intérêts, dividendes

et autres comptes à payer et bénéfices non répartis.

3. Comprend les obligations garanties par l'administration indiquée.

4. Antérieurement au 4^e trimestre 1966, ce poste comprenait les éléments suivants du passif: intérêts, dividendes et impôts.

5. Ces chiffres ne sont pas strictement comparables à ceux des années antérieures.

6. La variation provient en grande partie de changements dans certains comptes entre sociétés affiliées.

★ Credit extended mainly to individuals, includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms of credit for which no statistics are available.

1. The figures shown represent the instalment loan balances outstanding on retail purchases of consumers' goods financed under conditional sales agreements by sales finance and consumer loan companies. The sales finance companies extend a small amount of cash loans but monthly data on cash loans is available only for the consumer loan companies.

2. Companies licensed under the Small Loans Act and affiliated companies engaged in making personal loans.

3. See table on page 342, for complete breakdown of chartered bank personal loans.

4. Figures for dates other than year-ends are estimated on the basis of loans made by sixteen companies.

5. Not strictly comparable to the data shown for the earlier period because outstanding loans which have financed passenger cars used for commercial purposes are excluded beginning in January 1970.

* Crédits accordés surtout aux particuliers. Y compris certains montants, dont l'importance ne peut être déterminée, qui ont servi à des fins autres que la consommation; non compris, d'autre part, certaines formes de crédit qui ne font l'objet d'aucune statistique.

1. Financement, au moyen de contrats de vente conditionnelle, d'achats au détail de biens de consommation. Non compris, dans le cas des sociétés de financement, un montant, d'ailleurs peu important, de prêts en espèces, qui ne font l'objet d'aucune statistique mensuelle.

- Sociétés sous le régime de la Loi sur les petits prêts personnels et sociétés filiales qui pratiquent le prêt personnel.
- Le tableau à la page 342 donne une ventilation des prêts personnels des banques à charte.
- Sauf en fin d'année, les chiffres sont des estimations, faites à partir du montant des prêts de seize sociétés.
- Ces chiffres ne sont pas strictement comparables à ceux des années précédentes car, à partir de janvier 1970, l'encours des prêts pour le financement d'achats de voitures particulières destinées à un usage commercial en a été exclus.

- Includes small amount of investments (less than \$1.1 million at April 30, 1970).
- The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

- Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 30 avril 1970).
- Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.
2. New and used vehicles.
3. Beginning in January 1970, passenger cars used for commercial purposes are included in the data relating to commercial goods rather than consumer goods.
4. Beginning in January 1970, includes the installment financing of the consumer loan companies.

† Revised.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible d'établir un total pour cette année. A partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.
2. Véhicules neufs et d'occasion.
3. A partir de janvier 1970, les données relatives aux voitures particulières affectées à l'usage d'entreprises commerciales sont recensées sous la rubrique des biens utilisés par les entreprises et non celle des biens de consommation.
4. A partir de janvier 1970, ces chiffres comprennent les données relatives aux ventes à tempérament financées par les sociétés de crédit à la consommation.

*NOTE: D.B.S. recently released the summary results of a complete and comprehensive revision of the National Income and Expenditure Accounts. This revision was carried out at the annual level only; a revision of quarterly estimates is now underway and will not be available for some time. During the interim period, 1968 quarterly data previously published have been restructured into a new framework of the accounts and then adjusted arith-

metically to the new annual totals; these revised estimates have been linked forward for the first two quarters of 1969. In this publication, data are given for the income and expenditure tables only and for G.N.E. in constant (1961) dollars; a full set of tables will be prepared at the time of the fourth quarter. Detailed quarterly data on the unrevised basis are available from D.B.S. on request.

*NOTE: Le B.F.S. a publié récemment les résultats sommaires d'une révision complète et détaillée des Revenus et des Dépenses de la Comptabilité Nationale. Cette révision n'a porté que sur les chiffres annuels; une révision des estimations trimestrielles est en cours mais ne paraîtra pas avant quelque temps. Dans l'intervalle, les données trimestrielles de 1968 précédemment publiées ont été refondues dans le nouveau cadre des comptes nationaux

après un ajustement arithmétique en vue de les concilier avec les nouveaux totaux annuels et on a révisé les chiffres des deux premiers trimestres de 1969 proportionnellement. Nous publions, pour le moment, les tableaux des Revenus et des Dépenses ainsi que les chiffres de la Dépense nationale brute aux prix de 1961; la série complète des tableaux sera publiée en même temps que les données du quatrième trimestre. On peut obtenir du BFS, sur demande, les données trimestrielles détaillées non révisées.

★ Canada's quota in the General Account of the I.M.F. was set at the equivalent of U.S. \$300 million in February 1947, raised to U.S. \$550 million in October 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars. Transactions with the Special Drawing Account are not included in this table; Canada's holdings of SDRs are shown in the table on the facing page.

- Loans to I.M.F. by Canada under the General Arrangements to Borrow.
- Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966 and I.M.F. dividend payments to Canada of U.S. \$2.8 million in October 1968 and U.S. \$0.2 million in October 1969. All other transactions are gold sales to Canada by the I.M.F.
- Loans resulting from Canadian transactions with the I.M.F. and with other participants.
- Equals I.M.F. holdings of Canadian dollars minus the Canadian quota.
- Equals the Canadian quota plus outstanding loans under the GAB minus I.M.F. holdings of Canadian dollars. This is the amount of foreign exchange which Canada is entitled to draw from the Fund on demand for balance of payments purposes.

- Y compris le paiement de notre souscription en monnaie canadienne, équivalant à 142.5 millions de dollars É.-U. en mai 1966 et le versement de dividendes par le F.M.I. au Canada, pour un montant de 2.8 millions de dollars É.-U. en octobre 1968 et de 0.2 million de dollars É.-U. en octobre 1969. Toutes les autres transactions sont des ventes d'or au Canada par le F.M.I.
- Prêts résultant de transactions du Canada avec le F.M.I. et avec d'autres participants.
- Avoir du F.M.I. en dollars canadiens, moins la quote-part du Canada au Fonds.

- On November 10, 1969 the Banque Populaire (previously the Banque d'Économie de Québec) commenced operations as a chartered bank. As a result at November 30, Canadian dollar deposits of the chartered banks were increased by \$66 million and the principal asset items affected were provincial and municipal securities, other residential mortgages and general loans.
- In January these items reflect a change in the classification of chartered bank holdings of short-term paper and are not completely comparable with the data for earlier months. Previously, holdings of paper with an original term to maturity of one year or less issued by customers of a bank with established lines of credit were classified as loans. Short-term paper is now classified as a loan only if it is purchased from the issuer; paper purchased from third parties subsequent to issue is classified as a security. Under this new classification the corresponding figures for December 1969 would have been: Net Foreign Currency Assets, \$186 million; Instalment Finance Company Loans, \$471 million; General Loans, \$14,817 million; and Corporate Securities, \$809 million.

- La Banque d'Économie de Québec, banque d'épargne, est devenue, le 10 novembre

1969, La Banque Populaire, avec un statut de banque à charte. Ses dépôts, qui sont depuis lors recensés avec ceux des banques à charte, étaient de l'ordre de \$66 millions au 30 novembre. À l'Actif, les principaux postes touchés par ce changement sont les suivants: Titres des provinces, Titres des municipalités, Autres prêts hypothécaires à l'habitation et Prêts généraux.

- A partir de janvier, les chiffres de ces postes ne sont pas strictement comparables à ceux des mois précédents — par suite d'une modification de la classification du papier à court terme détenu par les banques à charte. Avant cette année, les billets à court terme (ayant une échéance initiale d'un an ou moins) signés par des clients jouissant de facilités de crédit auprès d'une banque figuraient au bilan de cette banque comme prêts. Désormais, ces billets ne figurent sous cette rubrique que si la banque les a achetés directement de l'émetteur même; les billets achetés de tiers après leur émission sont considérés comme titres. D'après cette nouvelle classification, les chiffres correspondants pour décembre 1969 auraient été: Avoir net en monnaies étrangères, —\$186 millions; Prêts aux sociétés de financement des ventes à tempérament, \$471 millions; Prêts généraux, \$14,817; et Titres des sociétés, \$809 millions.

★ Averages of juridical days during period indicated except that in accordance with section 71 of the Bank Act of 1954, Bank of Canada notes and Canadian dollar deposit liabilities are averages of the four consecutive Wednesdays ending with the second last Wednesday of the previous month.

- Until June 1967 the required cash reserve ratio was 8% on both demand and notice deposits. For the next eight months the required minimum monthly average on demand deposits was increased by one-half of one per cent per month while that on notice deposits was decreased by one-half of one per cent. Since February 1968 the required ratios have been 12 per cent for demand deposits and 4 per cent for notice deposits as prescribed under the Bank Act. Starting in January 1969 the averaging periods for the required cash reserve ratio comprises: (a) business days up to and including the fifteenth of the month and (b) all the other business days in the month.
- Prior to March 1968 the chartered banks agreed on a voluntary basis to maintain secondary reserves, consisting of excess cash reserves, day-to-day loans and treasury bills, equal to not less than 7 per cent of their Canadian dollar deposit liabilities. Under the provisions of Section 18(2) of the 1967 Bank of Canada Act the Bank was empowered to establish a secondary reserve ratio requirement within the range of 6 per cent to 12 per cent of Canadian dollar deposit liabilities under certain conditions.

★ Moyenne des jours ouvrables au cours de la période indiquée, sauf que pour les billets de la Banque du Canada et les dépôts en dollars canadiens, les chiffres retenus sont, conformément à l'article 71 de la Loi sur les banques, la moyenne des quatre mercredis précédant immédiatement le dernier mercredi du mois antérieur.

- Jusqu'en juin 1967, le coefficient légal des réserves-encaisse était de 8% des dépôts à vue aussi bien que des dépôts sujets à préavis. Au cours des huit mois qui ont suivi, la moyenne mensuelle minimale applicable aux dépôts à vue a été augmentée progressivement de ½ de 1% par mois tandis que celle qui s'applique aux dépôts sujets à préavis a été réduite de ½ de 1% par mois. Ainsi donc, depuis février 1968, conformément à la Loi sur les banques, les coefficients exigés sont de 12% dans le cas des dépôts à vue et de 4% dans le cas des dépôts sujets à préavis. Depuis janvier 1969, les périodes sur lesquelles sont calculés les coefficients moyens des réserves-encaisse sont, selon le cas: (a) les jours ouvrables du 1^{er} au 15 du mois ou (b) les jours ouvrables du 16 à la fin du mois.
- Avant mars 1968, les banques à charte avaient volontairement consenti à maintenir des réserves secondaires, composées de l'excédent de leurs réserves-encaisse, de prêts au jour le jour et de bons du Trésor, et dont le montant ne serait pas inférieur à 7% de leur passif-dépôt en dollars canadiens. Aux termes de l'article 18(2) de la Loi sur la Banque du Canada, la Banque a le pouvoir de fixer, moyennant certaines conditions, le niveau minimal requis pour les réserves secondaires entre 6 et 12% du passif-dépôt en dollars canadiens.

1. Le tableau tient compte de l'ensemble des avoirs et engagements en monnaies étrangères, qu'ils aient été comptabilisés sur les livres des sièges et succursales au Canada ou sur ceux des succursales ou agences à l'étranger. Détails supplémentaires aux deux pages suivantes et à la page 793 du Bulletin Statistique de décembre 1965.
2. À l'exclusion des titres émis par des emprunteurs canadiens en monnaies étrangères, ces titres figurant aux bilans des banques comme titres canadiens; à l'exclusion également de certains autres avoirs étrangers, notamment les immeubles des banques à l'étranger et leurs investissements dans des sociétés qu'elles contrôlent.
3. Y compris les monnaies divisionnaires et billets d'autres pays, l'or et les effets en monnaies étrangères en cours de compensation. À noter, cependant, que le solde net de ces effets est souvent créditeur.

NOTE: Tables showing the historical series which are available for these rates can be obtained on request from the Research Department, Bank of Canada, Ottawa 4.

- The effective dates are shown in brackets.
- In addition to the changes indicated above, the Bank Rate was reduced from 7.50 to 7.00 per cent effective July 2, 1968.
- Following the Wednesday date shown. Weekly data are given on page 331.
- Direct debt payable in Canadian dollars and excluding perpetuals. The yields are calculated from Wednesday mid-market closing prices. In addition to these marketable securities the Government of Canada also issues Canada Savings Bonds. The yields to maturity on recent Canada Savings Bond issues have been: 5.00% for the November 1, 1964 series; 5.03% for the November 1, 1965 series; 5.48% for the November 1, 1966 and the November 1, 1967 series; 6.88% for the May 1, 1968 series and 6.75% for the November 1, 1968 series.
- The yields shown here refer to the last business day of the month. The average of the terms to maturity of the bonds in each series has recently been about 20 years. The composition of the bond portfolio underlying the averages is available from McLeod, Young, Weir and Company Limited on request.
- Since June 14, 1966 the average of posted rates for 90-day finance company paper has been weighted by the amount of paper outstanding for each of the companies in the average. Prior to that time it is an unweighted average.
- Typical posted rates on large deposits. At times actual rates paid have been in excess of these posted rates. The rates shown refer to the last Wednesday of each month.

- Non-chequeable savings deposits were introduced by the chartered banks in May 1967 following the revision of the Bank Act.
- As at month-end.
- With the co-operation of the chartered banks the Bank of Canada initiated a quarterly survey of chartered bank lending rates in November 1968. The survey covers all loan transactions, whereby a customer's account is credited with funds whether under existing, new or renewed authorizations. The survey specifically excludes unsecured personal loans, residential mortgage loans, day loans, call loans and loans to grain dealers. The banks selected a broadly representative sample of branches which report the details of all their loans made on three consecutive days near the middle of each quarter. A total of 125 branches are involved and they have reported on approximately 5,000 loans each quarter. The rates shown are weighted by dollar volume.
- Starting in January of 1966, this rate is a monthly average of the weekly rates quoted by a number of large trust companies; prior to that time the rates quoted are as of the last Wednesday of each month.
- The mortgage market rates shown here are published by the Central Mortgage and Housing Corporation. The prime conventional mortgage rate is a simple average of rates charged by institutional lenders for residential mortgage loans. The NHA rates for the period prior to October 1967 are the maximum permissible rates set by order-in-council. NHA mortgage loans were usually made at the maximum rates at that time. For the subsequent period the average rates actually charged by the approved lenders are presented. These rates are often below the maximum rate.

SOURCES: McLeod, Young, Weir and Company Limited, la Société centrale d'hypothèques et de logement et la Banque du Canada.

NOTE: On pourra obtenir, sur simple demande, au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux donnant les chiffres antérieurs des taux en question.

1. La date d'entrée en vigueur est indiquée entre parenthèses.
2. Le taux de l'escompte a en outre été réduit de 7½% à 7% à partir du 2 juillet 1968.
3. Lendemain du mercredi indiqué en regard. Les données hebdomadaires se trouvent à la page 331.
4. Dette publique payable en dollars canadiens à l'exclusion des obligations perpétuelles. Les rendements sont calculés sur la moyenne des cours acheteur et vendeur à la clôture le mercredi. En plus de ces titres négociables, le gouvernement canadien émet des obligations d'épargne du Canada, dont les taux de rendement jusqu'à l'échéance s'établissent comme suit dans le cas des plus récentes séries: 5% pour l'émission du 1er novembre 1964, 5.03% pour celle du 1er novembre 1965, 5.48% pour celles du 1er novembre 1966 et du 1er novembre 1967, 6.88% pour l'émission du 1er mai 1968 et 6.75% pour celle du 1er novembre 1968.
5. Les taux de rendement indiqués sont calculés sur le cours de clôture du dernier jour ouvrable du mois. La moyenne des échéances des obligations de chacun des deux groupes était récemment d'environ 20 ans. On peut obtenir de la maison McLeod, Young, Weir and Company Limited, sur simple demande, les détails du portefeuille à la base de ce calcul.
6. Depuis le 6 juillet 1966, la moyenne des taux affichés du papier à 90 jours des sociétés de financement est pondérée d'après l'encours pour chacune des sociétés dont le papier entre en ligne de compte. Moyenne non pondérée avant la date susmentionnée.
7. Taux affichés pour les dépôts de sommes importantes. Les taux réels sont parfois supérieurs à ceux qui sont affichés. Les taux indiqués sont ceux du dernier mercredi du mois.

8. Les dépôts d'épargne sans faculté de tirage par chèques ont été introduits par les banques à charte en mai 1967, à la suite de la révision de la Loi sur les banques.

9. A la fin du mois.

10. Grâce à la coopération des banques à charte, la Banque du Canada a entrepris en novembre 1968 de faire trimestriellement un relevé des taux d'intérêt débiteurs pratiqués par les banques. Ce relevé couvre toutes les opérations de prêts qui se traduisent par un crédit au compte d'un client, que ce soit en vertu d'autorisations existantes ou nouvelles, ou encore de renouvellements. En sont expressément exclus les prêts personnels, les prêts hypothécaires à l'habitation, les prêts au jour le jour, les prêts sur titres et les prêts aux négociants en céréales. Chaque banque a choisi un échantillon aussi représentatif que possible de ses succursales, à qui elle a demandé de fournir les détails nécessaires sur tous les prêts consentis au cours de trois jours consécutifs vers le milieu de chaque trimestre. Au total, 125 succursales participent à chacun de ces relevés trimestriels, qui portent en moyenne sur 5,000 prêts. Les taux indiqués sont pondérés par le montant des prêts.

11. Taux cotés par un certain nombre de sociétés de fiducie importantes. A partir de janvier 1966, les taux sont des moyennes des taux hebdomadaires; avant cette date, taux du dernier mercredi du mois.

12. Les taux du marché hypothécaire indiqués sont ceux que publie la Société centrale d'hypothèques et de logement. Dans le cas des prêts hypothécaires ordinaires, il s'agit d'une moyenne des taux préférentiels appliqués par les établissements prêteurs sur les prêts à l'habitation. Le taux L.N.H. pour la période antérieure à octobre 1967 est le taux maximal fixé par arrêté en conseil. Les prêts hypothécaires accordés dans le cadre de la L.N.H. étaient d'habitude au taux maximal alors en vigueur. Par la suite, les taux indiqués sont les moyennes des taux effectivement appliqués par les prêteurs agréés et sont souvent inférieurs au taux maximal autorisé.

- Comprend les émissions d'institutions canadiennes (religieuses et autres) et d'emprunteurs étrangers, en dollars canadiens.
- Les chiffres sont basés sur les données du B.F.S., qui couvrent le papier émis par l'ensemble de ces sociétés, réparti par devises. À compter de mars 1965, ces chiffres ne sont pas strictement comparables à ceux des séries de la page 446.

- Actions de sociétés canadiennes émises en monnaies étrangères ou dont les dividendes sont payables en monnaies étrangères.

PAGE 451

- Non compris les bons du Trésor.

PAGE 452

- Y compris les bons du Trésor des provinces vendus par adjudication – mais non les bons placés directement, presque tous détenus d'ailleurs par les banques (qui les portent à leurs bilans comme prêts) et par les gouvernements provinciaux et fédéral.

- Non compris les dotations aux fonds d'amortissement.

- Non compris les obligations municipales garanties par les provinces (qui figurent déjà à la rubrique "Obligations émises ou garanties par les provinces"), ni les titres vendus directement aux provinces et leurs agences et dont voici une estimation:

- Obligations de sociétés canadiennes payables en dollars canadiens ou en monnaies étrangères – sauf, dans ce dernier cas, lorsque le produit doit en être utilisé à l'étranger – et obligations de sociétés étrangères en dollars canadiens, lorsque le produit doit en être utilisé au Canada. Non compris le papier commercial à un an ou moins.

- Les émissions des prêteurs étrangers se sont élevées à \$5 millions en 1964, à \$25 millions et \$7 millions respectivement pour les 1^{er} et 4^e trimestres de 1965, \$20 millions en 1966, \$20 millions en 1967, et \$15 millions en 1968. Il y a eu des amortissements et des rachats tout au cours des années indiquées.

- Aux prix d'émission.

- Y compris les actions émises en monnaies étrangères ou dont les dividendes sont payables en monnaies étrangères.

- Non compris le rachat par des compagnies d'assurance-vie de leurs propres actions, (article 90A de la Loi sur les compagnies d'assurance canadiennes et britanniques).

- Y compris les sommes distribuées par la B.C. Power Corporation à ses actionnaires – sur les fonds reçus de la province de la Colombie-Britannique – en paiement d'actions de la B.C. Electric, soit \$115 millions au 1^{er} trimestre de 1964 et \$2 millions au 1^{er} trimestre de 1965.

NOTE: On pourra obtenir sur simple demande au Service des recherches de la Banque du Canada, Ottawa 4, des tableaux indiquant, pour les titres du gouvernement canadien, les obligations des provinces et des sociétés, le montant des émissions brutes, amortissements et émissions nettes au cours de chaque trimestre, de 1936 à 1968. Peuvent aussi être obtenus des tableaux indiquant, pour les obligations du gouvernement canadien, des provinces, des municipalités et des sociétés, l'encours en fin d'année, de 1935 à 1968, réparti par devises de paiement.

CANADIAN ASSETS OF SIXTEEN LIFE INSURANCE COMPANIES AVOIRS CANADIENS DE SEIZE COMPAGNIES D'ASSURANCE-VIE

FOOTNOTES TO PAGE 376

RENVOIS DE LA PAGE 376

1. Relates to the life branch assets of 16 life insurance companies whose net premium income in Canada in 1969 was 80.1 per cent of the total of all companies registered under the federal Insurance Acts. Annual changes in asset holdings differ slightly from the net annual Canadian dollar investments of the same companies as shown in the table on pages 457-458, by reason of book valuation adjustments, time lags and minor differences of definition. In the case of the Canadian security holdings of the four companies whose head offices are outside Canada the table relates only to securities physically held in Canada by the Receiver General or Canadian trustees. A table showing total assets held in Canada by all life insurance companies appears on page 701 in the September 1969 Statistical Summary.

2. Comprises direct and guaranteed bonds, payable only or optionally in Canadian dollars, issued by federal, provincial and municipal governments and by Canadian incorporated companies and institutions. Includes the following holdings of bonds payable optionally in Canadian or foreign currencies:

| | 1963 | 1964 | 1965 | 1966 | 1967 | 1968 | 1969 |
|---------------------------------|------|------|------|------|------|------|------|
| Government of Canada Bonds .. | — | — | — | — | — | — | — |
| Provincial Bonds | 3.4 | 3.2 | 3.0 | 2.6 | 2.5 | 2.0 | 1.8 |
| Municipal Bonds | 4.7 | 3.7 | 3.4 | 3.3 | 3.0 | 2.7 | 0.2 |
| Corporation & Other Bonds | 2.5 | 2.1 | 2.9 | 2.6 | 1.9 | 1.6 | 3.4 |
| Total | 10.6 | 9.0 | 9.3 | 8.5 | 7.4 | 6.3 | 5.4 |

3. Figures for provincial bonds and corporate and other bonds are affected by a reclassification of corporate bonds as provincial-guaranteed bonds resulting from the expropriation of private utility companies by provincial governments in 1963.

4. Includes also bonds of foreign incorporated companies and institutions and foreign governments which are payable in Canadian dollars only.

5. Stocks of Canadian incorporated companies regardless of the currency in which dividends are paid. Excludes life company purchases of own stock under mutualization plans.

6. Purchases of own stock pursuant to section 90A of the Canadian and British Insurance Companies Act (conversion of capital stock companies into mutual companies). Gross purchases amounted to \$1.4 million in 1963 while amounts written down were \$16.0 million in 1962, \$4.8 million in 1963, \$4.8 million in 1964, \$3.8 million in 1965, \$2.3 million in 1966 and \$1.9 million in 1967.

7. All holdings relating to property situated in Canada.

8. Includes real estate held for the production of income.

9. Loans to policyholders whose usual place of residence is in Canada.

10. Cash held in Canadian offices of the life companies or in banks in Canada.

11. Includes all other "ledger" assets which are admitted by the federal Dept. of Insurance and physically held in Canada. Excludes "non-ledger" assets such as amounts due and accrued from investment income, insurance premiums, annuity considerations, and amounts due from other companies.

1. Avoirs de la branche-vie de 16 compagnies d'assurance-vie qui, en 1969, ont encaissé 80.1% des primes nettes versées à l'ensemble des compagnies inscrites au registre fédéral des assurances. Par suite des réévaluations du portefeuille, de certains décalages et de définitions un peu différentes, les variations des avoirs d'une année à l'autre ne concordent pas strictement avec les placements nets en dollars canadiens (tableau des pages 457 et 458) de ces mêmes compagnies au cours de l'année. Dans le cas des portefeuilles-titres canadiens détenus par les quatre compagnies dont les sièges sociaux sont situés à l'étranger, le tableau ne tient compte que des titres matériellement détenus au Canada par le Receveur général ou des fiduciaires canadiens. On trouvera, à la page 701 du Bulletin Statistique de septembre 1969, un tableau montrant l'ensemble des avoirs détenus au Canada par toutes les compagnies d'assurance vie.

2. Comprend les obligations libellées en dollars canadiens ou dont les porteurs peuvent demander le remboursement en dollars canadiens, émises ou garanties par les administrations fédérale, provinciales et municipales, ou par des sociétés ou autres institutions canadiennes. Y compris les obligations ci-après, dont les porteurs peuvent demander le remboursement en dollars canadiens ou en monnaies étrangères, à leur choix.

| Total | 10.6 | 9.0 | 9.3 | 8.5 | 7.4 | 6.3 | 5.4 |

3. Par suite de l'expropriation par deux provinces en 1963 de certaines sociétés privées de services publics, les obligations de ces sociétés sont devenues obligations provinciales.

4. Y compris aussi les obligations émises par des sociétés ou autres institutions étrangères ou par des gouvernements étrangers et payables en dollars canadiens seulement.

5. Actions de sociétés canadiennes, sans égard à la monnaie dans laquelle les dividendes sont payés. Non compris les actions de compagnies d'assurance-vie rachetées par les compagnies émettrices en vue d'une conversion en mutuelle.

6. Actions rachetées par les compagnies d'assurance-vie sous le régime de l'article 90A de la Loi sur les compagnies d'assurance canadiennes et britanniques (conversion en mutuelles des compagnies à capital social). Montants bruts des rachats: \$1.4 millions en 1963, \$16.0 millions en 1962, \$4.8 millions en 1963, \$4.8 millions en 1964, \$3.8 millions en 1965, \$2.3 millions en 1966 et \$1.9 millions en 1967.

7. Ne tient compte que des immeubles situés au Canada.

8. Y compris les immeubles détenus en vue d'en tirer un revenu.

9. Prêts à des assurés qui résident habituellement au Canada.

10. Encaisse des bureaux canadiens et dépôts dans les banques au Canada.

11. Comprend tous les autres éléments d'actif qui sont matériellement détenus au Canada et que la Surintendance fédérale des assurances permet de comptabiliser au bilan. Non compris les éléments "hors bilan", comme les sommes courues mais non encaissées au titre des revenus de placements, des primes pour assurances et annuités, et des montants dus par d'autres compagnies.

1. Valeur comptable.

2. Avant le 4^e trimestre 1966, plusieurs sociétés déclaraient leurs placements en titres et en prêts hypothécaires après déduction des réserves de placement. Par la suite, leurs placements figurent au prix coûtant et les réserves correspondantes font l'objet d'une rubrique spéciale. Antérieurement au 4^e trimestre 1966, le total de l'actif ne comprend pas les dividendes, les intérêts courus et autres comptes à recevoir. Ces montants étaient alors déduits de l'ensemble des postes suivants du passif: intérêts, dividendes,

autres comptes à payer et bénéfices non répartis.

3. Comprend les obligations garanties par l'administration indiquée.

4. Antérieurement au 4^e trimestre 1966, ce poste comprenait les éléments suivants du passif: intérêts, dividendes et impôts.

5. Ces chiffres ne sont pas strictement comparables à ceux des années antérieures.

6. La variation provient en grande partie de changements dans certains comptes entre sociétés affiliées.

★ Credit extended mainly to individuals, includes unidentifiable amounts of credit extended for non-consumer purposes; excludes certain forms of credit for which no statistics are available.

1. The figures shown represent the instalment loan balances outstanding on retail purchases of consumers' goods financed under conditional sales agreements by sales finance and consumer loan companies. The sales finance companies extend a small amount of cash loans but monthly data on cash loans is available only for the consumer loan companies.

2. Companies licensed under the Small Loans Act and affiliated companies engaged in making personal loans.

3. See table on page 423, for complete breakdown of chartered bank personal loans.

4. Figures for dates other than year-ends are estimated on the basis of loans made by sixteen companies.

5. Not strictly comparable to the data shown for the earlier period because outstanding loans which have financed passenger cars used for commercial purposes are excluded beginning in January 1970.

★ Crédits accordés surtout aux particuliers. Y compris certains montants, dont l'importance ne peut être déterminée, qui ont servi à des fins autres que la consommation; non compris, d'autre part, certaines formes de crédit qui ne font l'objet d'aucune statistique.

1. Financement, au moyen de contrats de vente conditionnelle, d'achats au détail de biens de consommation. Non compris, dans le cas des sociétés de financement, un montant, d'ailleurs peu important, de prêts en espèces, qui ne font l'objet d'aucune statistique mensuelle.

2. Sociétés sous le régime de la Loi sur les petits prêts personnels et sociétés filiales qui pratiquent le prêt personnel.

3. Le tableau à la page 423 donne une ventilation des prêts personnels des banques à charte.

4. Sauf en fin d'année, les chiffres sont des estimations, faites à partir du montant des prêts de seize sociétés.

5. Ces chiffres ne sont pas strictement comparables à ceux des années précédentes car, à partir de janvier 1970, l'encours des prêts pour le financement d'achats de voitures particulières destinées à un usage commercial en a été exclus.

1. Includes small amount of investments (less than \$1.1 million at April 30, 1970).

2. The change in loans outstanding does not necessarily equal the difference between disbursements and repayments because of financial year-end accounting adjustments.

SOURCE: Banque d'Expansion Industrielle.

1. Y compris quelques participations pour de faibles montants (moins de 1,100,000 dollars au 30 avril 1970).

2. Les variations de l'encours ne représentent pas toujours exactement la différence entre les avances et les remboursements, par suite des ajustements comptables en fin d'exercice.

** The totals for 1966 are unavailable because of a revision in the reporting method of a major respondent. Data subsequent to January 1966 is not comparable with earlier statistics.

1. Repayments are estimated by subtracting the net change in balances outstanding during a period from the paper purchased. The figure therefore also includes cancellations and any other adjustments to the two reported series.
2. New and used vehicles.
3. Beginning in January 1970, passenger cars used for commercial purposes are included in the data relating to commercial goods rather than consumer goods.
4. Beginning in January 1970, includes the instalment financing of the consumer loan companies.

† Revised.

** Une grande société ayant modifié sa méthode de comptabiliser ces données au cours de 1966, il est impossible d'établir un total pour cette année. À partir de février 1966, les chiffres publiés sous cette rubrique ne sont pas comparables à ceux des périodes précédentes.

1. Les montants des remboursements sont des estimations, obtenues en soustrayant du montant du papier acheté au cours de chaque période la variation de l'encours durant cette même période. Ces chiffres sont donc affectés dans une certaine mesure par les annulations et autres ajustements portant sur l'une ou l'autre des autres rubriques.
2. Véhicules neufs et d'occasion.
3. À partir de janvier 1970, les données relatives aux voitures particulières affectées à l'usage d'entreprises commerciales sont recensées sous la rubrique des biens utilisés par les entreprises et non celle des biens de consommation.
4. À partir de janvier 1970, ces chiffres comprennent les données relatives aux ventes à tempérament financées par les sociétés de crédit à la consommation.

★ Canada's quota in the General Account of the I.M.F. was set at the equivalent of U.S. \$300 million in February 1947, raised to U.S. \$550 million in October 1959 and to U.S. \$740 million in May 1966 with 25% subscribed in gold and 75% in Canadian dollars. Transactions with the Special Drawing Account are not included in this table; Canada's holdings of SDR's are shown in the table on the facing page.

- Loans to I.M.F. by Canada under the General Arrangements to Borrow.
- Includes subscription payment in Canadian dollars of U.S. \$142.5 million in May 1966 and I.M.F. dividend payments to Canada of U.S. \$2.8 million in October 1968 and U.S. \$0.2 million in October 1969. All other transactions are gold sales to Canada by the I.M.F.
- Loans resulting from Canadian transactions with the I.M.F. and with other participants.
- Equals I.M.F. holdings of Canadian dollars minus the Canadian quota.
- Equals the Canadian quota plus outstanding loans under the GAB minus I.M.F. holdings of Canadian dollars. This is the amount of foreign exchange which Canada is entitled to draw from the Fund on demand for balance of payments purposes.

★ La quote-part du Canada au Compte Général du F.M.I., fixée à la contre-valeur de 300 millions de dollars É.-U. en février 1947, fut portée à 550 millions de dollars É.-U. en octobre 1959 et à 740 millions de dollars É.-U. en mai 1966; 25% ont été souscrits en or et 75% en dollars canadiens. Les transactions entre le Canada et le Fonds au titre des Droits de Tirage Spéciaux ne figurent pas au tableau ci-dessus; on trouvera à la page suivante les données relatives aux D.T.S. détenus par le Canada.

- Prêts du Canada au F.M.I. en vertu des Accords Généraux d'Emprunt.
- Y compris le paiement de notre souscription en monnaie canadienne, équivalant à 142,5 millions de dollars É.-U. en mai 1966 et le versement de dividendes par le F.M.I. au Canada, pour un montant de 2,8 millions de dollars É.-U. en octobre 1968 et de 0,2 million de dollars É.-U. en octobre 1969. Toutes les autres transactions sont des ventes d'or au Canada par le F.M.I.
- Prêts résultant de transactions du Canada avec le F.M.I. et avec d'autres participants.
- Avoir du F.M.I. en dollars canadiens, moins la quote-part du Canada au Fonds.
- Quote-part du Canada, plus les prêts du Canada en vertu des A.G.d'E., moins l'avoir du Fonds en dollars canadiens; en d'autres termes, montant que le Canada est autorisé à tirer sur le Fonds en monnaies étrangères pour les besoins de sa balance des paiements.

★ Based on Import Commodity Classification introduced by D.B.S. in January 1964. A complete list of the commodity classification numbers included in each category is available on request from the Research Department, Bank of Canada.

■ Arbitrary adjustments have been made to the import commodity detail for the period from the second quarter 1966 to the third quarter 1967 to allow for revisions to the import figures caused by a lag in the receipt by D.B.S. of import documents from an important Canadian port.

1. Comprises conveying, elevating, material handling, construction, excavating, mining, petroleum and natural gas industries equipment.
2. Comprises mainly wood, paper, metalworking, printing, book binding, textiles, leather, food and tobacco industries equipment.
3. Comprises mainly industrial furnaces and linings, other general purpose industrial machinery, communications industry equipment, precision instruments, scientific and medical equipment, hand tools, office equipment and furniture.
4. Includes non-alcoholic beverages.
5. Mainly shipments valued at less than \$200 each and Canadian exports returned.

★ D'après la nomenclature des produits importés adoptée par le B.F.S. en janvier 1964. On pourra obtenir sur simple demande au Service des recherches de la Banque du Canada, à Ottawa, la liste complète des numéros de tous les produits groupés dans chaque catégorie.

- Par suite de certains retards survenus dans la réception des documents d'importation transmis au B.F.S. par un important port canadien entre avril 1966 et septembre 1967, le montant des importations pour les six trimestres en question a été révisé et les différences ont été réparties arbitrairement entre les diverses catégories de produits importés.
1. Comprend les convoyeurs et le matériel pour levage, manutention, construction, excavation, mines et industries du pétrole et du gaz naturel.
 2. Comprend principalement le matériel des secteurs suivants: bois, papier, métallurgie, imprimerie, reliure, textiles, cuir, aliments et tabacs.
 3. Comprend principalement: fours industriels et garnitures, autres machines industrielles d'utilité générale, matériels de télécommunication, instruments de précision, matériel scientifique et médical, outils portatifs, matériels et mobiliers de bureau.
 4. Y compris les boissons non alcooliques.
 5. Principalement les expéditions d'une valeur de moins de \$200 et les exportations canadiennes renvoyées à l'étranger.
